**PANGOLINS CONFISCATED IN NAMIBIA SINCE 2018**

## OUR MISSION

We are dedicated to protecting Africa's most trafficked mammal, the pangolin.

We conserve pangolins through protection, research, and rewilding.

## OUR VISION

**People-powered, community-driven, and science backed**

PROTECT

RESEARCH

REWILD

- 🔍 Applied research for conservation management & planning
- 🛡️ Protection through community engagement and empowerment
- 🤝 Collaboration with governments & stakeholders
- 🗣️ Advocacy & opportunities for youth
- 🌱 Rewilding of rescued pangolins

## GET INVOLVED

Together, we can open people's hearts to pangolins. Every donation and partnership brings us closer to a future where pangolins thrive in the wild.

### Ways to support:

1. Become a pangolin protector and sponsor
2. Support the Pangolin Emergency Fund
3. Follow us and share our story online

PCRf is a Namibian based not-for profit  
Section 21, Reg: 21/2021/0542  
PO Box 97944  
Windhoek, Namibia

PANGOLIN  
CONSERVATION &  
RESEARCH FOUNDATION

**PCRf**   
Research. Protect. Rewild.

## PROTECT

### GUARDIANS OF BIODIVERSITY

We empower local communities through opportunities and training to safeguard biodiversity in core pangolin landscapes.

#### FOCAL EFFORTS:

- **Training & Employment of** community game guards and Pangolin Guardians who patrol, monitor, and report crime
- **Community Empowerment and Engagement** supporting sustainable livelihoods through job opportunities and crafts
- **Capacity Building & Collaboration** with the Ministry of Environment, Forestry, and Tourism and local stakeholders
- **Awareness & Advocacy** by raising local and global awareness about pangolins, ensuring they are protected
- **Internships** for local NUST and UNAM students from WIL to PhD level.

## RESEARCH

### SCIENCE SAFEGUARDING PANGOLINS

Our research isn't just about data, it's about turning knowledge into action. We use pangolins as an umbrella species for at risk ecosystems and a beacon for biodiversity.

- **Baseline population data** – building the first long-term datasets to track pangolin numbers and trends with the help of our dedicated guardians.
- **Habitat use, ecology & threats** – identifying how pangolins interact with their ecosystems, pinpointing key areas for protection, and tackling risks like poaching.
- **Policy** – providing governments with evidence to strengthen conservation planning, wildlife laws and enforcement.
- **Science for communities** – translating data into solutions that benefit both pangolins and people.

## REWILD

### SECOND CHANCES IN THE WILD

Every rescue tells a story of resilience. PCRf's rehabilitation and release program gives pangolins hope and a second chance in the wild.

#### KEY IMPACTS

- **45 pangolins rescued**
- Increased survival by **50%** from 40% to 90%
- Developed **national guidelines**
- Dedicated **rehabilitation centre** opening in 2026
